2 INTRODUCTION

Kalgoorlie Consolidated Gold Mines Pty Ltd (KCGM) operates the Gidji Gold Processing Plant (the Gidji Project) which is located approximately 17 km north of the City of Kalgoorlie-Boulder. The plant treats refractory sulphide ore concentrate which is transported by road from KCGM's Fimiston Processing Plant.

In 2015 the two Satellite Roasters which previously operated at the plant to process the concentrate were decommissioned, following installation of a second UFG mill. As a result of these changes KCGM made an application in April 2015 to rationalise and contemporise conditions of Gidji Ministerial Statements No. 28 and 77. During May 2016 the Environmental Protection Authority (EPA) released its report and recommendations on the proposed amendments to the statements (EPA Report No:1566) and in June 2016 published Ministerial Statement No. 1032 (1032:M), approving the changes under Part IV of the *Environmental Protection Act 1986*.

The Gidji Project infrastructure includes:

- A carbon-in-pulp (CIP) circuit;
- Two Ultra Fine Grinding (UFG) mills (Isa Mill M3000 and Isa Mill M10000) with a combined production throughput of 438,000 tonnes per annum (tpa);
- Tailings storage facilities (TSFs); and
- Associated infrastructure.

The Gidji Project is expected to continue operating until 2029. Its location is shown in Figure 1.

Figure 1: Location of the Gidji Project

3 PURPOSE

In accordance with condition 3-6 of 1032:M, a Compliance Assessment Report (CAR) must be submitted to the Chief Executive Officer of the OEPA (now the Chief Executive Officer of the Department of Water and Environmental Regulation (DWER)) by February 28 of each year, or as otherwise agreed, addressing the period of the preceding calendar year. The CAR shall address compliance with each condition of 1032:M, identify all potential non-compliances and describe corrective and preventative actions taken; and indicate any proposed changes to the Compliance Assessment Plan (CAP).

This CAR covers the period from 1 January 2017 to 31 December 2017 (the reporting period).

4 CURRENT STATUS

4.1 Project Milestones

A summary of milestones/achievements related to the Gidji Project is provided in Table 1.

Table 1: Project Milestones

DATE	MILESTONE
21 April 2015	KCGM submitted an application to rationalise and contemporise conditions of Ministerial Statements 28 and 77 following the planned closure of the Gidji roasters.
16 May 2016	EPA releases its report and recommendations on the proposed amendments to Ministerial Statements 28 and 77 (EPA R&R No: 1566).
30 June 2016	Ministerial Statement No. 1032 published, superseding Ministerial Statement No. 28 and 77.
15 September 2016	Compliance Assessment Plan for 1032:M submitted to OEPA.
4 October 2016	OEPA approves the CAP advising in writing that it satisfies the requirement of Condition 3-1 and 3-2 of Ministerial Statement No. 1032.
5 October 2016	Gidji licence L5946/1988/13 amended to increase the production throughput capacity to 438,000 tpa.
23 February 2017	2016 Gidji Gold Processing Plant Compliance Assessment Report submitted to OEPA.

4.2 Production Throughput

The Gidji Gold Processing Plant treats the sulphide concentrate produced by the Fimiston Processing Plant. This concentrate is processed through two ultra-fine-grinding (UFG) Mills with the resulting finely ground product leached in aqueous cyanide prior to gold recovery via activated carbon in the carbon-in-pulp (CIP) circuit. Final gold recovery, and elution of the loaded carbon, is conducted at the Fimiston Processing Plant with final tailings pumped to the Fimiston and Kaltails TSFs.

The Gidji Project has an approved production throughput of 438,000 tonnes per annum. The total quantity of concentrate treated at Gidji during the reporting period was 393,692 tonnes.

4.3 Operational Areas

The location and extent of the Concentrate Processing area and Tailings Storage Facility area are defined in Schedules 1 and 2 of 1032:M. The approved disturbance footprint area is 73 ha as shown in Figure 2. Within the Tailings Storage Facility area clearing of no more than 63 ha within the disturbance boundary is authorised, and in the Concentrate Processing Area clearing of no more than 10 ha within the disturbance boundary is authorised.

Within the reporting period KCGM did not clear any areas outside of the 73 ha disturbance boundary. Within the reporting period the disturbance area has not changed since the previous year. The total cleared area within the Tailings Storage Facility area is 61.6 ha, and the total cleared area within the Concentrate Processing area is 6.4 ha. This disturbance data was reported in the Mining Rehabilitation Fund report submitted to the Department of Mines and Petroleum in June 2017.

Figure 2: Disturbance Boundary

5 COMPLIANCE

There were no non-compliances identified during the reporting period. A Statement of Compliance is provided as Appendix A.

Compliance against each condition of 1032:M is addressed in the Completed Audit Table provided as Appendix B.

6 REVIEW OF THE CAP

KCGM submitted a CAP to the OEPA on 15 September 2016 for the Gidji Project which was prepared in accordance with the 'Post Assessment Guideline for Preparing a Compliance Assessment Plan', Post Assessment Guideline No. 2, (OEPA, August 2012). On the 4 October 2016 KCGM received a letter from the OEPA advising that the CAP satisfies conditions 3-1 and 3-2 of 1032:M.

There are no changes to the CAP proposed for 2018.
